Reboot a Server

1. **Access Your Clusters**
   - In the **left-hand menu**, click on **Clusters**.
2. **Select Your Desired Cluster**
   - On the **Clusters Summary** page, locate and click on the cluster you wish to work with.
   - You will see a list of all servers associated with that cluster.
3. **Choose the Server to Reboot**
   - Scroll through the list and select the server you want to reboot.
4. **Initiate the Reboot Process**
   - On the **right-hand side** of the selected server row, click on **Actions**.
   - From the dropdown, choose **Reboot Server**.
5. **Confirm the Reboot**
   - A confirmation prompt will appear. Click **Confirm** to proceed.
   - The server will now begin the reboot process.

Following these steps will safely reboot your chosen server.
